BizMan Group of Products**BizMan Financials 2**

The first customized financials reporting solution for Simply Accounting. Since February 2001, BizMan Financials has provided Simply Accounting users an alternative to the financial reports provided with the program. Easily run Balance Sheet and Income Statements that are presented in a professional and presentation quality manner suitable for any Board of Directors or Financial institution.

In addition, run reports that are not available in Simply Accounting. Use any of the template reports for your business management by comparing a month and the year-to-date figures to the budget. Review each account as a percentage of total revenue. Run a single departmental report and the budget in it's own column, showing the net income for each column.

Each template can be modified with the Crystal Reports program supplied with Simply Accounting. Templates can be created to group accounts based on the user's specifications, rather than via account classes or GIFL codes. Several invoice templates are included on the CD.

BizMan Reports - NEW

This program is new in 2005. Use BizMan Reports to replace the Custom Reports utility in Simply Accounting. Use it to run any report you created or that was created for you. Store your reports anywhere you want and just refer to them with BizMan Reports. Create your own categories to manage your reports. Users can open any Simply Accounting file without having to open it first in Simply Accounting. Use BizMan Reports to determine which version of Simply Accounting, the file came from. The main screen also shows the fiscal years available in the file, path and the company name.

As an added feature, BizMan Reports works with you and Simply Accounting. Want a packing slip printed each time you print an invoice, use BizMan Reports. This program knows when you print most forms and can print any form automatically for you to either a window on screen or direct to the printer. Several reports and forms are included.

BizMan Ledger Imports - NEW

Ever had problems moving ledger information from one Simply Accounting file to another? Can't figure out how to use Excel to massage the information? Tired of trying to remember the version codes? Use BizMan Ledger Imports to create those import files for you. Then sit back and let Simply Accounting do the imports. Creating all ledger import files takes only a few minutes and they are ready for import. Then create the new file and tell Simply which files to use as import files. Cut your new file setups from hours to minutes when you need to create new files based on old ones. Supports all files back to Simply 9 up to Simply 2006.
